### **Anti-Fall-Off Screw Knob**

The anti-fall-off screw knob of the iPad/tablet roll stand is Enterprise's exclusive design. The unique design allows the iPad/tablet roll stand users to adjust the pole height easily. The screw knob will not fall off even when the users turn it to the last thread. This user-friendly design not only saves pick up time for the iPad/tablet roll stand users but also lowers the probability of losing the screw knob.

Low Centre of Gravity Base

### **Tip Resistant 5-Legged Aluminium Base**

The low-centre-of-gravity design of 5-legged aluminium base for iPad / Tablet Roll Stand (20" Base) creates easier, more stable mobility and reduces the risk of tipping.

### **Noiseless and Easy Roll Twin Casters**

The selected 3" twin wheel, soft casters allow you to easily move this stand quietly and quickly. Two lockable casters secure the stand in place.

Sealed precision Ball Bearings

### **Lockable Tablet Mount**

The lockable tablet mount allows you to quickly lock the cradle and keep your tablet secured. This will help protect your tablet from falling out and from theft. The Sliding brackets allows use of any 9" to 11" tablet sizes.

### **Optimal Viewing Comfort**

The tablet holder can tilt 155 degrees and rotate 360 degrees for portrait or landscape mode for enabling optimal viewing comfort.
